HR (JW), at the end of the am session today's WG hrgs John Chancellor volunteered a few comments I know to be less than precise but close. Then he went into something else, out of the blue and except in context, kind of FBI WG investigation, without connection: that Walter Pincus, the New Republic's investigative reporter, ~~has~~ gotten hold of the Parker addressbook several months after WG and called people in it, finding two who by then had never been spoken to by FBI. If JW had this article, I think he'd have sent it to me. So, when you have time, would you please check at the library and if it has any names in it, please copy? That the FBI conducted a worse investogation that re JFK is clear enough from Gray's confirmation testimony, which I now have, printed by GPO. If you want, ask Senator. Thanks, HW 8/6/73
